1.8 Council League Tables

The Detail Data project authored by Cormac Campbell offers a report that examines the disparities between each of Northern Ireland's 11 councils. The analysis - which ranks the councils from 1 (best)-to-11 (worst) across each of the areas of life covered by the research.

The datasets behind the article are provided here. They look at:

- Estimated council debt and assets per capita
- Local rates (using a £150k home as an illustration)
- Claimant count (% of population)
- Median earnings
- Educational attainment (% pupils 5 GCSEs A*-C inc. English and Maths)
- Pupils entitled to free school meals (%)
- Life expectancy men and women
- Households in housing stress (% of population) and empty homes (%)

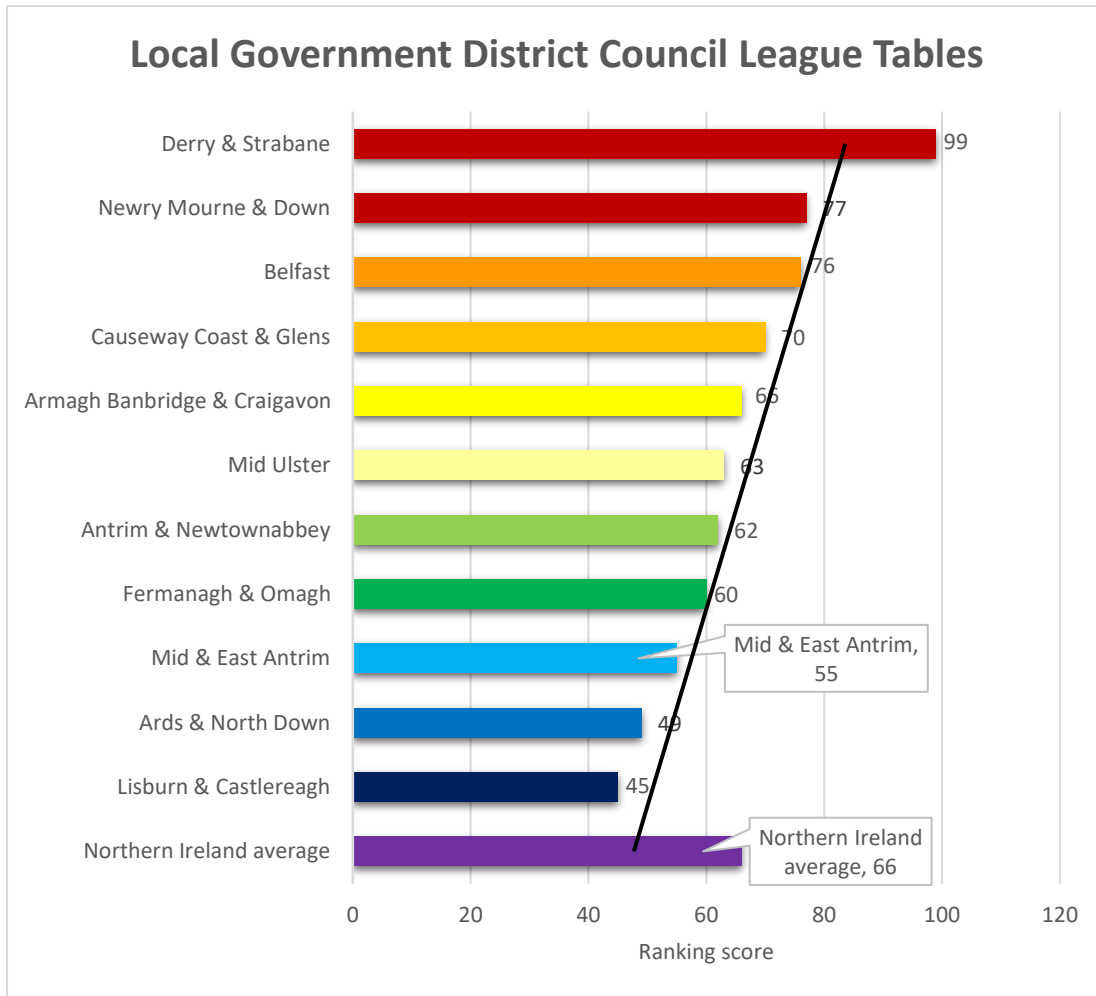

The results have been used to construct a league table, ranking each of the councils from 1 to 11 on the variables above.

1.9 Northern Ireland Multiple Deprivation Measures (NIMDM)

The Northern Ireland Multiple Deprivation Measure was published in November 2017, identifying small area concentrations of multiple deprivation across Northern Ireland. The results are presented by small areas known as Super Output Areas (SOAs). Northern Ireland is divided into 890 of these SOAs which are ranked according to deprivation using seven domains, or distinct types which in composite form is known as the Multiple Deprivation Measure. These are:

- Income Domain
- Employment Domain
- Health Deprivation and Disability Domain
- Education, Skills and Training Domain
- Access to Services Domain
- Living Environment Domain
- Crime and Disorder Domain

The table below compares the relative distribution of the SOA count in each LGD and the 100 most deprived Super Output Areas within the local government districts, using:

1. The NI Multiple Deprivation Measure, and
2. The Income Deprivation Affecting Children sub-domain (a constituent of the Income Domain)
