Local Government Districts (LGD) Northern Ireland

In 2008, the Northern Ireland Assembly approved the reform of Local Government Districts. The change moved Local Government Districts from 26 Districts to 11 new Districts, as well as making changes to the powers of Local Government. The new 11 Districts are made up of 80 District Electoral Areas, which form the basis for the electoral representation on councils.

Chart X - Projected Youth Population by Local Government Districts 2024 – 2036

The population projections for this chart and below table are based on nisra 2018 sub-national population projections for Northern Ireland and Local Government Districts, which slightly differ from the previous population projections based on nisra 2020interim population projections.

This data set provides population projections for Local Government Districts (which the 2020 data set does not), however it must be noted that there is a slight variance in overall population projections for years 2024-2036 between both data sets.

Child Poverty

The proportion of children in relative poverty (BHC) is estimated to be 24% (approximately 109,000) in 2022/23, which is higher than the estimate of 18% in 2021/22. This is a statistically significant increase.

In 2022/23 the proportion of children in absolute poverty (BHC) increased to 19% (approximately 86,000), from 15% in 2021/22.

Over the last ten years, the proportion of children in relative poverty (BHC) has fluctuated between a high of 25% in 2014/15 and a low of 18% in 2021/22. The proportion of children in absolute poverty (BHC) generally showed a decreasing trend between 2012/13 and 2017/18 before beginning to fluctuate in more recent years.

The long term trend shows that children are at a higher risk of living in poverty than the overall Northern Ireland population in both relative and absolute measures.

How its measured

Relative Poverty

An individual is considered to be in relative poverty if they are living in a household with an equivalised income below 60% of UK median income in the year in question.

This is a measure of whether those in the lowest income households are keeping pace with the growth of incomes in the population as a whole.

In 2022/23 the relative poverty threshold for a couple with no children was an income of £373 per week (BHC) from all sources. For a couple with children the threshold would be higher and for a single person (without children) the threshold would be lower (£250).

The percentage of children living in relative poverty in 2022/23 was 24%; compared to 18% in 2021/22. This is a statistically significant increase. Children living in absolute poverty rose from 15% to 19% over the same period.[3]

Absolute Poverty

An individual is considered to be in absolute poverty if they are living in a household with an equivalised income below 60% of the (inflation adjusted) UK median income in 2010/11.

This is a measure of whether those in the lowest income households are seeing their incomes rise in real terms.

DRAFT

In 2022/23 the absolute poverty threshold for a couple with no children was an income of £347 per week (BHC). For a couple with children the threshold would be higher and for a single person (without children) the threshold would be lower (£232).[4]

Child

A dependent child is defined as an individual aged under 16. A person will also be defined as a child if they are 16 to 19-years old and they are:

- Not married nor in a Civil Partnership nor living with a partner; and
- Living with parents; and
- In full time non-advanced education or in unwaged government training.[5]
